Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I. Claims 6-33 and 36-39, drawn to the products such as a disposable cover, classified in Class 206, subclass 320 and others.

Group II. Claims 1-5, 34, 35, 40 and 41, drawn to a method of covering a body of a patient bed hand control box, classified in Class 53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions [II] and [I] are related as process of covering and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by providing the disposable cover for covering a remote control or microphone or providing the disposable cover without a notch in at least one of the panel.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.

A telephone call was made to Applicant's representative on 6/13/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
